Senior Frontend and Mobile Developer with over 9 years of experience building scalable web and cross-platform mobile applications using React Native, React, Vue, Next.js, and TypeScript. Experienced in delivering production-ready features, integrating APIs, improving application performance, and collaborating with product, design, QA, and backend teams. Proven ability to lead frontend initiatives and create reliable user experiences across fintech, e-commerce, banking, and consumer technology products.

WORK EXPERIENCE

Gorilla Logic

Remote

Senior Mobile Developer — Client: Hunter Douglas

March 2025–Present

- Develop and maintain cross-platform mobile application features for Hunter Douglas using React Native and TypeScript, delivering consistent experiences across iOS and Android.
- Translate product requirements and UI/UX specifications into reusable components, responsive screens, navigation flows, and maintainable mobile architecture.
- Integrate mobile features with backend services and REST APIs, implementing reliable data handling, loading states, validation, error management, and user feedback.
- Investigate and resolve functional and performance issues, improving rendering efficiency, application stability, and the overall quality of critical user journeys.
- Collaborate closely with product managers, designers, backend engineers, and QA specialists in an Agile environment to estimate, implement, test, and release new functionality.
- Contribute to code reviews, technical discussions, automated testing, and release preparation while promoting clean code, reusable patterns, and engineering best practices.

Midas Labs

Calgary, Canada

Senior Frontend Developer

September 2023–February 2025

- Designed and developed a banking application using React Native and TypeScript, focusing on performance and scalability.
- Developed and deployed multiple projects using Next.js, improving server-side rendering, SEO, and application speed.
- Enhanced the user interface with advanced animations, leading to a 20% improvement in user satisfaction scores.
- Collaborated with backend teams to ensure seamless integration and optimized API consumption.

Flahmingo

Toronto, Canada

Senior Frontend Developer

April 2022–April 2023

- Contributed to the development of fintech applications, implementing secure and efficient payment flows.
- Improved code quality and performance by introducing reusable components and TypeScript best practices.
